

ARYAN GUPTA

Frontend Engineer | React · Angular · TypeScript | Full Stack Capable

+91-8699828447 | aryan2k1.gupta@gmail.com | [LinkedIn](#) | [GitHub](#) | India (open to relocate to Bengaluru, Pune, Noida, Gurgaon, Hyderabad)

PROFESSIONAL SUMMARY

Frontend Engineer with 2.5 years of experience building production-grade web applications in React, Angular, and TypeScript, including hands-on backend work with Node.js, Express, and MongoDB. Owned complex UI modules end-to-end in a healthcare-regulated environment, led a major framework migration, and delivered a full-stack proof-of-concept independently. Actively seeking a Frontend or Full Stack Engineer role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, Redux, Angular (v16 - v19), RxJS, ngRx, Tailwind CSS, Bootstrap, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Testing: Karma, Jasmine, React Testing Library

Tools & Practices: Git, VS Code, Postman, Component-driven architecture, Claude Code, Copilot, Codex, CI/CD

PROFESSIONAL EXPERIENCE

Frontend Engineer | Happiest Minds Technologies | Bengaluru, India

Aug 2023 – Dec 2025

Client: Mercury Ignite (WebMD) — Healthcare Platform

- Owned a complete UI module end-to-end — development, QA fixes, and UX validation — shipping 2 weeks ahead of schedule.
- Led the migration of a production Angular application from v16 to v19 across 15+ modules, resolving breaking changes and validating stability with zero post-release rollbacks.
- Designed a config-driven dynamic component architecture that consolidated 5 separate components into 1, cutting duplicate code by 30% and reducing ongoing maintenance effort by ~10 hrs/week.
- Translated product requirements into technical designs and partnered with QA to triage and close up to 20 defects per release cycle in a compliance-driven healthcare environment.
- Contributed to architectural refactoring initiatives improving scalability and maintainability across 10 shared modules.

Internal Project: Job Management Portal — Full Stack POC

- Independently designed and built a full-stack job management system for job postings and candidate applications, initiated as a self-driven internal POC.
- Built RESTful backend services with Node.js, Express.js, and MongoDB supporting real-time CRUD operations with data integrity.
- Structured frontend and backend with a modular architecture to support scalability and future feature expansion, delivering a production-ready POC end-to-end.
