PROFESSIONAL SUMMARY

2.5 years Frontend Engineer specializing in React, Angular, and TypeScript. Builds scalable, maintainable web UIs with clean architecture and component-driven design. Owns end-to-end modules, refactors legacy code, and ships features early in healthcare-compliant environments; collaborates across UX, QA, and backend.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frameworks: Angular, Express.js

Frontend: React, Redux, RxJS, Tailwind CSS, Bootstrap, HTML, CSS

Backend: Node.js

Tools: Git, VS Code, Postman, REST APIs

Databases: SQL, MongoDB

Methodologies: Component-driven architecture

PROFESSIONAL EXPERIENCE (2+ YEARS)

Software Engineer | **Happiest Minds Technologies** | **Bengaluru, India** | **Aug 2023 - Dec, 2025** • Led **end-to-end module ownership** across complex UI features, coordinating UX validation and QA to ensure release readiness and compliance.

- Orchestrated **framework upgrades** and dependency management, resolving breaking changes and validating stability post-migration.
- Established **component-driven architecture** and reusable patterns to minimize duplication and simplify enhancements; decreased maintenance effort by 10hrs/week.
- Translated product requirements into **technical designs** and partnered with QA to triage defects and harden releases.
- Contributed to **architectural refactoring** for scalability, observability, and maintainability in regulated healthcare contexts.

Technologies Used: Angular (v16–v19), React, TypeScript, RxJS, Redux, Tailwind CSS, Bootstrap, Node.js, Express.js, MongoDB, SQL, REST APIs, Git, VS Code, Postman

PROJECTS

Mercury Ignite (Healthcare Platform) | WebMD (via Happiest Minds Technologies)

Enterprise healthcare platform work including UI module delivery and Angular upgrade in a regulated environment with strict compliance.

- Contributed to release readiness by addressing frontend defects, UX feedback, and integration issues. • Developed reusable config-driven UI components to reduce duplication and simplify future enhancements.

Job Management Portal — Full Stack POC | Happiest Minds Technologies

Full-stack job posting and application system with RESTful backend services and modular architecture supporting scalability.

- Developed **RESTful services** with Node.js, Express.js, and MongoDB supporting real-time CRUD and data integrity. • Delivered a **production-ready POC** with a scalable modular structure enabling faster feature expansion.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering | August, 2019 - June, 2023

Chitkara University | Punjab, India
