PROFESSIONAL SUMMARY:

Frontend Engineer with 2+ years of experience building and maintaining production-grade web applications using React, Angular, and TypeScript. Proven ability to own complex UI modules end-to-end, refactor legacy systems, and deliver features ahead of schedule in healthcare-compliant environments. Strong focus on clean architecture, scalability, and long-term maintainability.

SKILLS

Languages: Javascript, Typescript

Front-End: React, Redux, Angular (16–19), RxJS, Tailwind CSS, Bootstrap

Backend (Working Knowledge): Node.js, Express.js

Databases: SQL, MongoDB (NoSQL)

Tools & Practices: Git, VS Code, Postman, REST APIs, Component-driven architecture

WORK EXPERIENCE:

HAPPIEST MINDS TECHNOLOGIES: (SOFTWARE ENGINEER) Aug, 2023 - Present

Client Project: Mercury Ignite (WebMD – Healthcare Platform)

- Owned and delivered a complete UI module end-to-end (development, QA fixes, UX validation), shipping 1 month ahead of schedule.
- Led migration of a large-scale application from Angular 16 to Angular 19, improving framework consistency, maintainability, and long-term upgrade readiness.
- Designed and implemented a config-driven dynamic component system, consolidating 5 separate components into one, significantly reducing code duplication and future development effort.
- Worked closely with product managers, QA, designers, and client stakeholders to refine requirements and ship stable, compliant releases.
- Contributed to architectural discussions and refactoring decisions in a healthcare-regulated environment, ensuring reliability and compliance.

Job Management Portal – Full Stack POC

- Independently designed and developed a full-stack job management system handling job postings and candidate applications.
- Built RESTful backend services using Node.js, Express.js, and MongoDB, supporting real-time CRUD operations with data integrity.
- Implemented clean, modular architecture with scalability in mind, making the system extensible for future features.
- Delivered a production-ready proof of concept demonstrating end-to-end ownership, not just frontend implementation.
