PROFESSIONAL SUMMARY:

Front End Developer with 2+ years of experience building scalable, high-performance web applications in Angular and React. Strong track record of delivering complex UI features ahead of schedule, driving architectural improvements, and collaborating with cross-functional teams in healthcare-compliant environments.

SKILLS

Languages: Javascript, Typescript, RxJS, Tailwind CSS, Bootstrap

Libraries or Frameworks: React, Redux, Angular 18+

DevOps/ Tools: Git Version Control, VS Code, Postman

Database: SQL, MongoDB(NoSQL)

WORK EXPERIENCE:

HAPPIEST MINDS TECHNOLOGIES: (SOFTWARE ENGINEER) Aug, 2023 - Present

Mercury Ignite (WebMD) – Healthcare Platform (Current Project) :

- Delivered a full UI module with complete functionality, QA validation, and UX approval one month ahead of the expected timeline.
- Migrated the application from Angular 16 to Angular 19, improving performance, maintainability, and framework consistency.
- Engineered a unified dynamic config-driven component system, reducing 5 separate components to single component, cutting duplication and simplifying future feature additions.
- Collaborated with product, QA, and cross-functional teams to ship stable, compliant releases within healthcare standards.
- Engaged with clients to refine feature requirements, clarify use cases, and align engineering decisions with business needs.

Job Management Portal – Full Stack POC :

- Independently designed and developed a full-stack job management system to handle job listings and candidate applications end-to-end.
- Built robust backend services using Node.js, Express.js, and MongoDB, supporting real-time CRUD operations with strong data integrity.
- Delivered a production-ready POC focused on scalability, clean architecture, and maintainable codebase for long-term extensibility.

EDUCATION: CHITKARA UNIVERSITY (2019-2023) - BE-CSE (CGPA - 9.89)
